

Minutes from the November 18, 2008 SHAC meeting: The precautionary measures that the athletic department is using to deal with staff infections was reviewed. In speaking with Coach Woods, I was informed that the coaches receive training on how to prevent staphylococcal infections. A list of the precautionary measures utilized by the athletic department was given to committee members. The committee then moved to a discussion of relevant topics. Ms. Boyett stated that there is a concern at the high school regarding the number of pregnancies. Ms. Joines stated that our counselor, Laura Jordan is familiar with a program that addresses this issue. The "Worth the Wait" program is from Scott and White Hospital out of Temple. Both Edna and Palacios are using the program at this time. Ms. Joines is going to ask Ms. Jordan to come to our next meeting on December 10th in order to get more information regarding this program. Ms. Hoffman is going to gather information from area doctors and report back to the committee.
