

Internet Filtering

Tidehaven ISD's filtering software blocks inappropriate websites on the Internet from entering our network.

Since the initial implementation of the Internet in TISD, the district has depended upon the District's Acceptable Use Policy (CQ LEGAL) to ensure appropriate use. Staff and students who use the Internet must have a signed District Agreement for an Electronic System Account on file. In addition, any students using the Internet under teacher supervision will continue to be monitored. No Internet filter is 100% guaranteed to restrict access to inappropriate content; however, we believe this proactive approach to Internet filtering will significantly reduce the opportunity to inadvertently reach an inappropriate site and bring comfort to teachers using the web in their instructional activities.

For more information on the website Internet filtering service, you may contact Heather Mendiola.
