

The students in Ms. Ortiz's fourth grade math class at Markham Elementary utilize many types of technology, but their favorite is the SMART Board. Ms. Ortiz reports that the SMART Board is a great tool for helping her students meet the specificity and rigor of the place value lesson. The students had a lot of fun learning about numbers in standard form and expressing them in expanded notation. Pictured from left to right are Makylah Hutson, Emma Beyer and Madilyn Spalek.
